

# Service Preparation Checklist - Roaches

---

- **Kitchen cabinets, pantries, stove storage compartments and bathroom vanities should be free of any stored items prior to treatment.**
- **All items that have been removed from the above areas and stored near area of treatment, should be covered prior to treatment.**
- **Items may be placed back into cabinets 2-3 hours after treatment is completed.**
- **All loose articles should be removed from the floor (clothes, shoes, luggage, boxes, etc).**
- **Fish tanks should be covered or removed from the area of treatment. Also, any small animals such as mice, hamsters, birds, etc. should be removed from the premises during treatment and for 2-3 hours after.**
- **Failure to comply with these requirements may void the service guarantee.**
